

SPECIFICATION SHEET

UT-12BC

Electronic flush valve for toilet operated by IR sensor. Includes override flush activator switch giving the user the possibility of alternative manual touch activation.

Model No.	UT-12BC
Product	Automatic Flusher for W.C. (Touch free operation with mechanical over ride button for emergency)
Power	Dual operation with Electrically/Battery operated options Solid brass valve for long lasting operation
Front Plate Size	137x150mm
Function	Detection time 2-3s., Flush timing 5s (adjustable by remote controller)
Feature	With mechanical manual over-ride
Type	Sensor operated
Inlet/Outlet DN25	≤G1uA
Plate material	304 S/S
Valve bodyl	Brass
Power supply	AC220&DC6V
Water pressure	0.05-0.7MPa
Static power consumption	≤30uA
Water flow adjustment	Yes
Sensor distance	70cm to white board (Adjustable by remote control)
Waterproof	IP45
