

## UT- PLUGGIN

This is a device to change manual faucet into automatic sensor faucet. Users just need to install our sensor device to their current faucet to make it as sensor faucet.

- 1) This is wave-on sensor. Function: Hands wave once, water automatically flows while hands wave again water automatically stops.
- 2) Time Limit: Washing time is set for 30secs. It means the sensor will automatically stop water flow if water continuously flows for 30 secs
- 3) Low power indication: Sensor LED continuously flash 5 times to indicate low power. This may indicate it is time to replace existing batteries with new ones or there is not enough power going to unit.
